The History about humans and space

Since the dawn of our species, we have looked up to the sky and imagining gods in it. That led to imagine constellations, which led to map the sky, which led to a boost in the development of science and maths

The evolution of Art

Old Civilizations

Classic Culture

Modern Painting

NASA

The Future

ArtAi builds a bridge between science, technology and art bringing all together as it was at the very beginning

This is JuliaArt

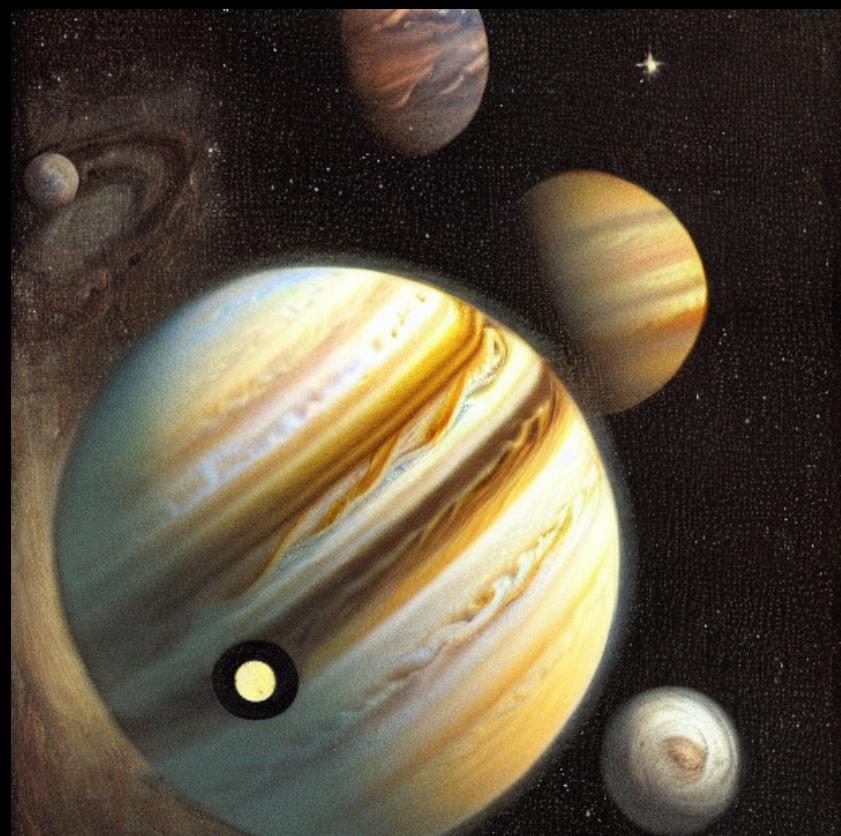

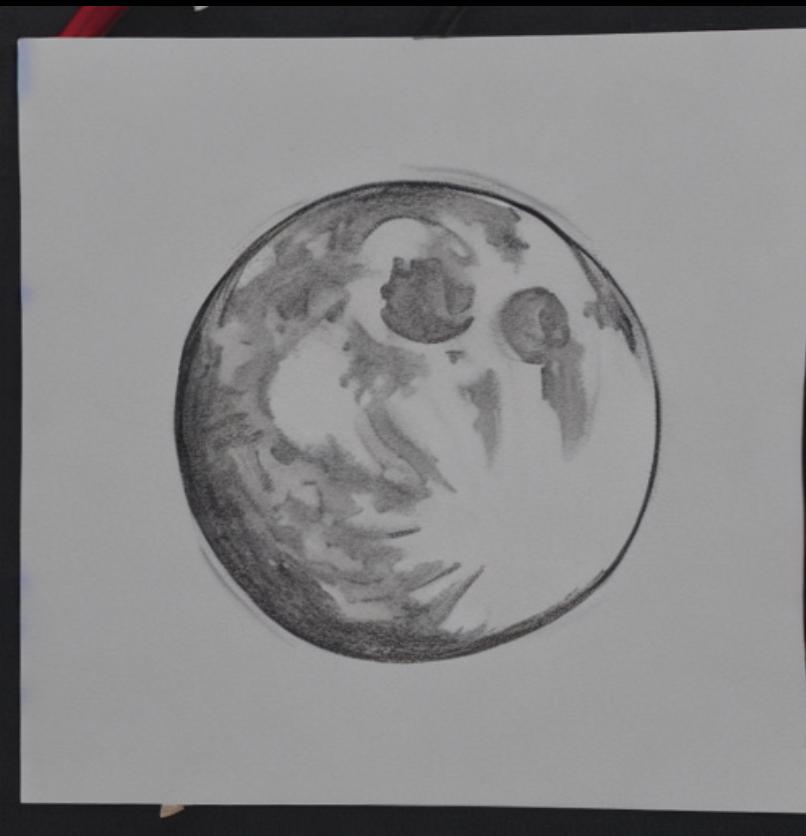

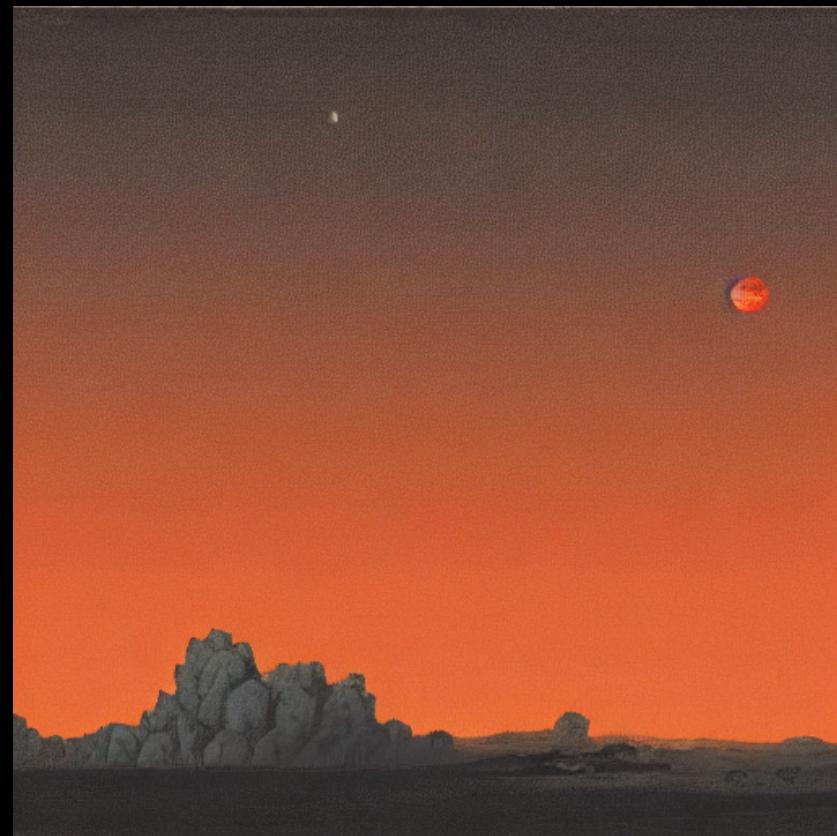

NASA

Not just the Space

As you can see, the AI actually learned the style,
and it's able to apply it to any input

To Sum Up

The Future
